

Madrid - 21th June 2019

To whom it may concern:

AECIM is an organization founded in 1977 with the objective of representing and defending the business development of the group of industrial enterprises currently comprised of more than 8,000 companies and nearly 600,000 employees in the Community of Madrid. At the heart of AECIM, there are not only businesses, but also Business Associations, some of which have been the product of AECIM and are run by our organization, grouping businesses by subsector.

We have been collaborating with Gedeth for several years to develop the international promotion of our members, specifically to the most vibrant markets of West Africa and France, in sectors such as aeronautics, automation, renewable energy, or commercial distribution. We have also collaborated in the organization of events like a conference about Smart Cities in South America, as well as in international training projects, facilitating knowledge about topics like customs management and international transport.

To date, we are very pleased with the services provided, and we are happy to recommend them.

Sincerely,
