

Date: 21st January 2022

This is to confirm that Enterprise Ireland, the Irish government agency responsible for the development and growth of Irish enterprises in world markets, has been working with Centrul Regional de Dezvoltare Factor SRL (FRD Center) since 1999.

FRD Center provided Enterprise Ireland and its client companies with high quality services focused primarily on market entry, distributor & customer search, market and competition research and in-market introductions.

FRD Centre supported Enterprise Ireland during trade missions, trade fair participations, market visits of Irish companies, promotion & marketing campaigns, and many other areas of business development. FRD Centre team also worked with Enterprise Ireland client companies independently, and in multiple markets in the region.

We are very happy with professionalism, dedication, and result-orientation of FRD Center and the quality of their services.

Please do not hesitate to contact me for further details of our co-operation.

Ladislav Müller
Director – Central & Southeast Europe
