This is to certify that in the period October - December 2020, my company, INNOVATEC, has hired Centrul Regional de Dezvoltare Factor SRL (FRD Center) for business partners search and selection services in Romania.

According to our requirements, the FRD Center team identified and selected over 60 local players manufacturing stainless steel or aluminum parts, cabinets, metal racks, custom made metal warehousing solutions and industrial parts etc.

We shortlisted 17 companies which FRD Center interviewed at Decision Maker level and provided us with a final report and contact details.

The services provided by FRD Center were professional, delivered in a timely manner. They proved a good knowledge of the Romanian metal manufacturing sector.
