

For decades RhyMech AG has been a reliable supplier to a number of different industries.

In the course of reorganisation, in mid-2014 the Board of Directors decided to implement the respective measures with the support of SME-Ventus GmbH. As we already had the managing partner of SME-Ventus on our team as a member of the Board of Directors when establishing the company in 2000, this decision was an easy one. We were familiar with Mr Piccirillo's skills in respect of structured work and thus, we were certain that we had chosen a suitable partner. It was important to us that the partner was prepared to take matters in their own hand with regard to the defined measures, as this allowed us to continue to focus on our main tasks.

We are very pleased with the services provided by SME-Ventus and will continue work with this partner in the future as and when required.

Widnau, January 2017, Urs Lenz, CEO of RhyMech AG.
