

WHY NID ATTENDS THE EPHJ EXHIBITION IN SWITZERLAND?

The biggest fair for Switzerland's key industries is now ongoing!

At Nordic Industries, our mission is to help clients successfully navigate international markets, enhance their competitive edge, and—most importantly—increase sales, no matter their current stage of development or market presence.

Switzerland is among the key markets for one of our customers, and being present where the industry gathers is essential to driving growth. That's why we attend EPHJ—the country's premier trade show for high-precision industries, including watchmaking and medical device manufacturing.

As we develop the Swiss market for our client FinnSonic, we meet with potential distributors, conduct market analysis, and explore new business opportunities—working side by side with our customer to build lasting success.
